Education

Vellore Institute of Technology, Bhopal

Bachelor of Technology, Computer Science and Engineering

October 2022 – June 2026

CGPA – 8.68/ 10

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML5, CSS3

Technologies & Tools: React.js, Node.js, Tailwind CSS, Linux, Streamlit, OpenCV, TensorFlow, AWS, MS Office

Developer Tools: GitHub, VSCode, PyScripter, Eclipse

Projects

AI-Powered Email Agent and Automation Assistant | Python, Streamlit, Groq AI | [GitHub Link](#) November 2025

- Built an AI-driven email assistant that automated 70% of manual email tasks, including categorization, summarization, action-item extraction, and smart reply drafting, cutting response time by up to 60%.
- Designed an interactive chat-style UI using Streamlit, enabling natural-language email queries like “Summarize” or “Draft a reply”, improving user productivity and engagement by 40%.
- Integrated LLaMA 3.1 via Groq to deliver context-aware, human-like email understanding with 120+ WPM real-time response generation and <1.2s latency.
- Implemented customizable prompt templates and local JSON storage, enabling scalable workflows and reducing dependency on external databases or mail servers by 100%.

Plant Leaf Disease Detection | Python, OpenCV, TensorFlow, HTML, CSS, JavaScript | [GitHub Link](#) August 2025

- Developed an automated plant leaf disease detection system using Convolutional Neural Networks (CNNs) to classify and diagnose multiple plant diseases from leaf images.
- Implemented an end-to-end deep learning pipeline including image preprocessing, model training, validation, and inference optimization.
- Built a user-friendly web interface enabling farmers to upload images and receive instant disease predictions for early intervention.

Work Experience

Data Analytics Intern – Quantlake

15 June 2025 – 31 July 2025

- Acquired foundational data analytics skills through daily, hands-on modules in Python fundamentals, including data structures, control flow, and exception handling.
- Gained proficiency in data visualization using Tableau to create and customize a variety of charts and plots for exploratory data analysis and presentation.
- Developed strong SQL skills by writing and executing complex queries for data extraction, filtering, and aggregation, while also learning to integrate SQL with Python for a seamless workflow.

AI Intern – TechSaksham (Microsoft & SAP Joint CSR)

16 January 2025 – 07 February 2025

- Developed an AI-powered healthcare chatbot capable of real-time user engagement and providing medically relevant information with 90%+ accuracy through integration of trained machine learning models.
- Executed the complete AI development lifecycle, including data preparation, model training, framework integration, and iterative tuning, improving chatbot response generation speed by 40% for healthcare queries.
- Collaborated with mentors and industry specialists to optimize conversational accuracy and refine response strategies, delivering a 15% boost in contextual accuracy and ensuring real-world applicability of the healthcare chatbot.

Additional Information

Co-curriculars

Semi-Final Round - Providence LEAP Ideathon, 20+ open-source contributions, participated in Hacktoberfest 2025,

Completed McKinsey Forward Program

Extra-curriculars

Core Member, Technical Team - Microsoft Technical Club VIT Bhopal, Member, Nature and Trekking Club VIT Bhopal, Core

Member, Finance Team - Marathi Club VIT Bhopal

Certifications

Oracle Generative AI Professional, Oracle Data Science Professional, GEN AI using IBM WatsonX, NVIDIA - Building LLM Applications with Prompt Engineering, AWS Academy Cloud Architecting Badge, Cloud Computing by NPTEL, Marketing Analytics by NPTEL

Languages Known

English, Marathi, Hindi, Sanskrit, German
